TRANSMISSION

Northpower's dedicated transmission team is pre qualified and approved for 220kV and 110kV de-energised works. In addition staff are Transpower E1 and E2 trained and approved. We have adopted and developed transmission-specific policies and service specifications to meet the required transmission industry standards.

The team is capable of carrying out pole, insulator, cross arm and conductor replacements, conductor re-tensioning, tower upgrades and thermal upgrades to existing lines.

With the highest priorities being safety and quality our focus is on understanding clients' requirements and deliverables to ensure a safe, consistent and high quality result. Expert planning and scheduling, attention to detail and a highly skilled team enable us to manage and complete each project to specification within time and budgetary requirements.

Northpower has close alliances with other contractors and customers providing access to specialist skills when required.

Northpower is committed to keeping clients informed and updated through ongoing communication and project co-ordination offering a safe, reliable, hassle free service.

TRANSMISSION CAPABILITIES:

- Line construction and maintenance
- Installation of line components
- Tower dismantling and steel replacement
- Tower foundation maintenance and reinforcement
- Transmission-related earthing, civil works and fibre optics
