The LED or INC group covers LED fixtures and incandescent lamps. For LED fixtures, the wattage is for the fixture, not the individual LED's that comprise the fixture. The FL, MV or SV group is for florescent lamps, mercury vapour lamps and sodium vapour lamps (high pressure or low pressure) and all other types, excluding LED and incandescent lamps. The wattage for the FL, MV or SV group is assessed on the lamp wattage, excluding the ballast. The lower wattages in the ballasts. For the purpose of the Registry, the Register Content Code and Available Hours is SL9.

Distribution Charge Discount

- 1. In the year commencing 1 April 2020, Northpower Limited will provide a discount for the benefit of Northpower consumers totalling an estimated \$10.3m. This will be a discount on Northpower's distribution charges and the amount which each consumer receives for each eligible ICP will be determined by the consumption notified to Northpower by the electricity retailers for the 12-month period to 30 September 2020 in two bands as follows:
 - Eligible ICPs with consumption exceeding 2,000 kWh will receive a single discount of \$192.
- · Eligible ICPs with consumption between 1 kWh and 2,000 kWh will receive a single discount of \$55.
- 2. To qualify as an eligible ICP, an ICP must be supplied from the Northpower electricity network with a registry status of "Active" (Connected) on 1 November 2020, have a current customer of an electricity retailer on that date, and the net consumption advised by the electricity retailers to Northpower for the 12-month period to 30 September 2020 for the ICP must be 1 kWh or greater.
- 3. Discounts will be applied via a credit on the electricity bill from the current electricity retailer during November 2020 or December 2020.
